(54) MACHINE TRANSLATION SYSTEM

(57)Abstract:

PURPOSE: To improve the quality of a translation result by easily and accurately determining a priority order at the time of referring to plural technical dictionaries.

CONSTITUTION: A technical dictionary storage part 10 stores plural technical dictionaries on different fields. A pair of an original word and its equivalent storage part 20 stores plural pairs of original words and equivalents which consists of one original word and its one equivalent. A weighing part 30 refers to the plural technical dictionaries based on the plural pairs of the original words and their equivalents stored in the pair of an original word and its equivalent storage part 20, calculates the weight of each technical dictionaries based on this referring result and determines the priority order of each technical dictionary based on the calculated weight. A translation processing part 40 executes translation by referring to the plural technical dictionaries based on the priority order determined by the weighting part 30.

LEGAL STATUS

[Date of request for examination] **13.07.2000**

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
